- Comprehensive **A+ notes** that cover all examinable concepts
- A large collection of exam-style questions & worked solutions
- Q & A sessions with VCAA assessors
- Access to a recording of the enrolled lecture(s) until after each subject exam
- **Generous discounts apply**
- **Unit 2 lectures are free of charge to schools booking into Unit 3/4 lectures! (notes excluded)**
- **Complimentary access for teachers**
- Lectures are available in a variety of Unit 2, 3 and 4 subjects

## Dates:

Term 3 school holidays.

## Venue:

**In person** lectures are held at The University of Melbourne.

**Online lectures** are live streamed, enabling real time audience participation. Sessions include real time screen capture and annotations, a video stream of the lecturer, chats, polls and quizzes, as well as live support.

**Lectures will also be recorded so that students can learn at their own pace and review examinable materials before their exams.**

### Well-Structured Revision Programs Can Save Huge Amounts of Study Time!

One of the **quickest ways** of preparing for exams is to have an experienced teacher work through examinable materials using both audio and visual processes simultaneously.

Revision programs structured in this manner offer students the opportunity to cover 2 to 5 times more information than if they were to work through the same materials on their own!

Hearing information from a **different perspective** also enables information to be engrained into long-term memory more effectively, improving the quality of exam responses and how well information can be applied in unfamiliar applications.

## What Happens During the Lectures?

Our VCE Exam Revision Lectures are well renowned for providing the **most in-depth** preparation for the VCE exams.

Students will receive a comprehensive and detailed coverage of examinable materials as specified in each subject's Study Design, to **VCAA examination standard**. Emphasis will be placed on the more challenging concepts, as well as the areas that have been poorly addressed in past VCE exams.

## Students will also:

- Correct problem areas.
- Clarify theoretical misconceptions that result in the **loss of valuable marks** in the exams.
- Master the more **difficult** components of each course.
- Work through key exam-style questions and learn to recognise potential sources of errors.
- Discover the **tricks and traps** that could appear in the exams.
- Develop strong examination skills so they can secure every possible mark in the exams.
- Receive **first-hand advice** regarding what markers expect from those students striving for the above average scores.
- Learn how to set out answers in accordance with the **marking schemes** used by **VCAA** exam markers.

## What Do Students Receive?

- An effective and time-efficient way to revise for the exams.
- The **highest quality** instruction from Victoria's **most trusted** VCE program provider.
- Engaging audio-visual presentations to cater for different learning styles.
- **Unlimited access** to a “view-on-demand” recording of the audio-visual presentation for each enrolled lecture until the day after each subject exam.
- Detailed, comprehensive **A+ notes** that include every key concept that could be examined, clear and concise explanations, fully worked examples with step-by-step instructions and exam watch-outs – saving students countless hours in study time.
- A **large collection** of exam-style questions to further consolidate and extend on taught skills at home.
- The skills and information needed to perform to a **high standard** in the VCAA exams.
- A level playing field (students taught by VCE exam assessors do have **an advantage** over other students).
- Friendly, engaging, passionate and committed teachers.

## Benefits of TSFX Revision Lectures

- Our revision programs enable students to revise course materials in an effective and time-saving manner (it's **much faster** to have an experienced teacher take you through course materials than working through them on your own).
- We'll take students through the exam revision process in a simple **step-by-step** manner.
- Hear information from a **different perspective** – improving the speed of learning as well as the quality of exam responses.
- Students will complete a large part of their exam preparations ahead of their VCE peers and reduce stress levels and study loads in the challenging weeks before the exams.
- **Save huge amounts of study time.** Students will learn 2 to 5 times more information than if they were to work through the same materials on their own!
- Students will become more motivated, develop greater confidence in their studies and achieve **higher** examination marks.
- As our lectures are longer in duration, students receive **detailed and comprehensive** coverage of examinable materials.
- Our lectures provide access to **highly successful teachers** and VCAA assessors that would not otherwise be accessible to students.

# How We Differ

Like most education organisations, TSFX works with students to improve academic results and to decrease the stress and pressure associated with the VCE. There are, however, differences between the various lecture providers, including variations in teaching philosophies and styles, how thoroughly subject materials are addressed, and the quality and quantity of support materials that are issued to students.

- We only use **qualified, experienced VCE teachers** who are current or recent VCAA assessors to produce our resources and deliver our programs.
- Our lectures are of the highest quality. Teachers and past students consistently rate TSFX **#1** for excellence and quality.
- Our programs are **longer in duration**, giving us the opportunity to cover materials more thoroughly (it's not possible to revise a whole year in a 2 – 3 hour lecture!)
- We provide students with **online recordings** of our lectures and weekly tuition programs so they can clarify missed concepts and revise efficiently before SACs and exams. Students have access to these recordings until after each subject exam.
- We provide students with a comprehensive bound set of **A+ notes** that cover everything they need to learn for the exams.

## Note:

To date **NO OTHER** lecture provider has been able to match the quality and depth of materials that are issued to students who attend TSFX programs.

- Our course materials are improved and extended upon on a yearly basis so that students receive the **best possible** notes and instruction that reflect the **annual changes** in exam marking and question trends.
- We offer a proven track history of **unrivalled success**.

We get results, and we can make a significant difference to your students' VCE marks. The average ATAR for students who attended our revision lectures in 2019 was **90.59!**

## Why You Can Trust Our Online Revision Lectures

- As we've been delivering online lectures for over two years, we've had the chance to revise and improve offerings, resulting in **engaging, quality online programs** for students.
- Our **online platform seamlessly and rapidly delivers core functions** such as streaming, scaling, screen sharing and content without lag, latency & instability – obstacles faced by most of the platforms used to deliver online lectures in Victoria.

Over 20,000 online courses have been delivered in 2020!
