

# **UNIT 2 MATHEMATICAL METHODS**

## **INDEX**

### **CALCULUS TECHNIQUES AND APPLICATIONS**

#### **Limits and Derivatives**

Conditions for the Existence of a Limit  
Evaluating Limits Graphically  
Limits of Hybrid Functions  
Evaluating Limits Algebraically  
Limit Theorems

#### **Differentiation**

Derivatives from First Principles

#### **Differentiation by Rule**

Derivatives of Polynomial and Rational Functions  
The Derivative of a Constant  
The Derivative of a Sum or Difference of a Series of Terms  
Finding Derivatives – General Approach  
Simplifying Expressions  
The Chain Rule  
The Product Rule  
The Quotient Rule  
Summary of Differentiation Techniques

#### **Applications in Differential Calculus**

Conditions for Differentiability  
Gradients at Specific Points

#### **Rates of Change**

Average Rates of Change  
Instantaneous Rates of Change  
Solving Worded Rate Problems

#### **The Newton-Rapson Method**

#### **Curve Sketching**

Stationary (Critical) Points  
Locating Stationary Points  
Local Maxima and Minima  
The First Derivative Test

#### **Global Maxima and Minima**

Finding the Global Maximum/Minimum Values

### **Solving Worded Optimisation Questions**

Graphs of the Derivative Function

### **Antidifferentiation**

Integrating Algebraic Expressions  
Integrating Expressions – General Approach  
Simplifying Expressions

### **Using Technology to Find Antiderivatives**

### **Solving for the Constant $c$**

### **Applications of Differentiation and Integration to Kinematics**

Motion in a Straight Line  
Distance and Displacement  
Speed and Velocity  
Acceleration  
Relationships Between Displacement, Velocity and Acceleration

### **Definite Integrals**

### **Analysis Tasks**

## **CIRCULAR, EXPONENTIAL & LOGARITHMIC FUNCTIONS**

### **Circular Functions (Trigonometry)**

Measuring Angles  
Angle Conversions  
Arc Length  
The Unit Circle  
Angles at the Axes  
Exact Values in the First Quadrant  
Symmetry Properties of the Unit Circle  
Summary of Signs (CAST)  
Complementary Angles  
Finding Exact Values of Trigonometric Expressions  
The Fundamental Trigonometric Identity

### **Graphs of Trigonometric Functions**

The Amplitude  
The Period  
Translations  
Summary of Transformations

Sketching Trigonometric Functions

### **Solving Trigonometric Equations**

General Solutions for Trigonometric Equations

### **Small Angle Approximation for Sine**

### **Exponential and Logarithmic Functions**

Indicial Expressions and Equations

Index Laws

Simplifying Indicial Expressions

Rational Exponents

Solving Indicial Equations

Logarithms

Logarithmic Laws

Simplifying Logarithmic Expressions

Solving Logarithmic Equations

Solving Indicial Equations Using Logarithms

### **The Exponential Graph**

Transformations Involving Exponential Functions

### **The Logarithmic Graph**

Transformations Involving Logarithmic Functions

### **Inverses of Exponential Functions**

Inverse Functions

Finding Equations Describing Inverse Functions

### **Exponential Models**
