

UNIT 4 BIOLOGY

INDEX

Units 4: How Does Life Change and Respond to Challenges Over Time?

Area of Study 1: How Are Species Related?

Area of Study 2: How Do Humans Impact on Biological Processes?

Area of Study 3: Practical Investigation

Conducting Controlled Experiments

Types of Errors

Accuracy, Precision and Validity

Presentation of Data

Background Genetics

Genes, Alleles and Genotypes

Environmental Influences and Phenotype

Genetic Engineering – Tools and Techniques

Isolating Cells

Obtaining the Cells' DNA

Restriction Enzymes

Ligases

Plasmids

Recombinant DNA and Gene Cloning

Transformation of Bacteria

Identifying Recombinant Cells

Reverse Transcriptase and Copy DNA

Methods of Gene Transfer

Making DNA Visible for Gel Electrophoresis

Gel Electrophoresis

Southern Blotting

Fragments Used in Gel Electrophoresis

RFLPs

Intact Alleles (e.g. cystic fibrosis)

Minisatellites in DNA Fingerprinting

Microsatellites (STRs) in DNA Profiling

Mitochondrial DNA (Hypervariable region)

Polymerase Chain Reaction (PCR)

Features Distinguishing DNA Profiling from DNA Fingerprinting

DNA Sequencing

Changes in Allele Frequencies in Populations

Monogenic Traits

Polygenic Traits

Continuous and Discrete Variation
Gene Pool Allele Frequencies

Mutations

Point Mutations
 Substitutions
 Frameshift Mutations (Insertions and Deletions)
Block Mutations
 Translocations
 Inversions
 Duplications
 Deletions
Chromosomal Abnormalities
 Non-Disjunction of Chromosomes
 Aneuploidy and Polyploidy

Variation, Natural Selection and Evolution

Species
Types of Variation
Causes of Genetic Variation
 Sexual Reproduction
 Mutation
 Gene Flow
 Genetic Drift
Environmental Selection Pressures
Heterozygote Advantage
Adaptation and Natural Selection
Development of Evolutionary Theory
Isolating Mechanisms Involved in Natural Selection
Prezygotic Isolating Mechanisms
Postzygotic Isolating Mechanisms
Forms of Natural Selection
Allopatric Speciation
Selective Breeding
Loss of Genetic Diversity Due to Selective Breeding
Increase in Genetic Abnormalities Due to Selective Breeding
Summary of Causes of Genetic Change in a Population
Biodiversity in Fragmented Populations
Extinction

Earth's Geological History

Significant Changes in Biodiversity Over Time
Mass Extinction Events

Examination Questions – Book 1

Evolution

Evidence for Evolution

1. Fossils
 - Fossilisation
 - Dating Fossils
 - Index Fossils
 - Absolute Dating
 - Transitional Fossils
 - Living Fossils
 - Continental Drift
2. Distribution of Present Day Organisms
3. Living Organisms in Process of Change
4. Comparative Anatomy
 - Homologous Structures
 - Analogous Structures
 - Vestigial Structures
5. Comparative Embryology
6. Molecular Homology
 - The Molecular Clock
 - Mitochondrial Eve
 - DNA Hybridisation
 - DNA Sequencing

Possible Modes of Evolution

Divergent Evolution
 Adaptive Radiation
 Convergent Evolution
 *Parallel Evolution
 Evolution: Gradual or Punctuated Equilibrium?
 Phylogenetic Trees and Cladograms

Master Regulatory Genes

Evolution Through Changes in Master Regulatory Genes

Hominin Evolution

Geological Time Scale in Relation to Humans
 Chordate Evolution
 Classification of Mammals
 Human Evolution
 Primate Features
 Living Primate Groups
 Hominoids, Hominids and Hominins
 Primate Evolution (Phylogenetic Tree)
 Humans
 Comparative Features of Humans and Other Apes
 Comparative Features of Humans and Gorillas
 Transitional Hominin Skulls
 Fossil Primates
 Hominins

Hominin Fossils
Sahelanthropus tchadensis
Orrorin
Ardipithecus
Australopithecus
Homo habilis
Homo rudolfensis
Homo ergaster/erectus
Homo floresiensis
Homo naledi
Homo heidelbergensis
Homo neanderthalensis
Homo sapiens

Proposed Hominin Phylogenetic Trees
Modern Human Origins
Out of Africa or Regional Continuity?
Hominin Evolution Theories Upended in Asia
Hominin Summary
Cultural Evolution
Technological Evolution

Human Intervention in Evolutionary Processes

Uses of Genetic Technology and Associated Issues

Gene Cloning
Transformation and Transfection
Potential and Real Uses of Transgenic Organisms
Other GM Issue Case Studies
GMO or TGO?
CrispR – Cas9 and Gene Editing
Genetic Screening
Gene Therapy

Challenges in Treating New Infectious Diseases

Emergence of New Infectious Disease
Misuse of Antimicrobial Drugs
Strategies to deal with the Emergence of new Diseases
Chemical Agents Against Pathogens
Viral Defence
Epidemics and Pandemics
Rational Drug Design

Examination Questions

Techniques for Improving Examination Performance
