

WHO WILL BE DELIVERING THE SUMMER SCHOOL HEAD START LECTURES?

To ensure **you secure every possible mark** in your SACs and exams, our ‘**Summer School Head Start Lectures**’ are prepared and delivered by experienced VCE teachers who are **current or recent VCE exam assessors (VCAA)** – the very same teachers who will be marking your VCE exams!

Don't be tempted by organisations that use university students as their lecturers. These students may have obtained a high ATAR or study score, but this **DOES NOT** equip a recent VCE graduate with the knowledge that's required to prepare students for their SACs and exams. As an example, a student who obtained a **study score of 45** in Mathematical Methods only **answered about 79% of Exam 2 correctly!** Recent VCE graduates **can't teach you** how and where marks are awarded, which terms or statements must be included in exam responses, and alternate answers that would also receive full marks. This information is **restricted to VCE exam markers** and can make a **huge difference to your VCE marks**.

Knowing how the exams are marked also gives VCE exam markers the ability to guide you through the exam preparation process in the **quickest and most effective way**. You'll spend your time revising **what really matters**, and you **can't get that kind of guidance** from recent high school graduates who have **no teaching experience**, and who **don't have access** to the detailed insights our teachers provide.

TSFX really is the **best choice** to give you that **important head-start** into Unit 1 or Unit 3.
