

## WHO WILL BE DELIVERING THE VCE SUMMER SCHOOL HEAD START LECTURES IN JANUARY 2024?

To ensure **you secure every possible mark** in your SACs and exams, our 'VCE Summer School: Head Start Lectures' are prepared and delivered by experienced VCE teachers who are **current or recent VCE exam assessors for VCAA** – the very same teachers who will be marking your VCE exams!

**Don't be tempted** by organisations that use university students as their lecturers. These students may have obtained a high ATAR or study score, but this **DOES NOT** equip a recent VCE graduate with the knowledge that's required to prepare students for their SACs and exams. As an example, a student who obtained a **study score of 45** in Mathematical Methods only **answered about 79% of Exam 2 correctly!** Recent VCE graduates **can't teach you** how and where marks are awarded, which terms or statements must be included in exam responses, and alternate answers that would also receive full marks. This information is **restricted to VCE exam assessors** and can make a **huge difference to your VCE scores**.

Knowing how the exams are marked also gives VCE exam assessors the ability to guide you through the exam preparation process in the **quickest and most effective way**. You'll spend your time revising **what really matters**, and you **can't get that kind of guidance** from recent high school graduates who have **no teaching experience**, and who **don't have access** to the detailed insights our teachers provide.

TSFX really is the **best choice** to give you that **important head-start** into Unit 1 or Unit 3.

Our teachers include authors of VCE textbooks, writers and markers of the VCE exams, Chief Assessors and Assistant Chief Assessors as well as leading experts in their subject fields. **Their wealth of experience is priceless.**

Not only do our Master Class teachers have **extensive experience** in the VCE, they have demonstrated a long and consistent history of **achieving outstanding student results**. They know exactly how to motivate students to pursue their best and **unlock their highest potential**. Our teachers are also trained to teach different types of learners, and how to maximise learning opportunities using **innovative pedagogical models** and approaches – skills that can only be acquired through formal teaching degrees.

**Experience is the best teacher, and a crucial asset at the end-game stage of 12+ years of schooling.**
